

## **Annotated Mojave Info Links**

Jim Macak - October 2018

These are the online resources to which I referred in my Double Click October meeting presentation about macOS 10.14 Mojave:

**Apple's Mojave main page** - a visually stunning state-of-the-art web page showcasing key features of Mojave:

<https://www.apple.com/macOS/mojave/>

**Take Control eBooks** - two relatively inexpensive downloadable guides to Mojave. The first addresses everything about the upgrade process and the second provides a thorough tutorial about Mojave's key features:

<https://www.takecontrolbooks.com/mojave-upgrading>

<https://www.takecontrolbooks.com/mojave>

**Ars Technica Mojave review** - a complete and technically accurate (yet easily understandable) review of the new macOS Mojave:

<https://arstechnica.com/features/2018/09/macOS-10-14-mojave-the-ars-technica-review/>

**What's New in Mojave** - a quick introduction to new features of Mojave with several screenshots and a 3-4 minute video:

<https://www.macrumors.com/roundup/macOS-10-14/>

**Mojave Video Walk-through** - many screenshots and two videos (17 and 21 minutes) detailing Mojave's new features:

<https://9to5mac.com/2018/09/24/macOS-mojave-top-features-changes-video>

**NightOwl** - a great little freeware utility that allows you to easily toggle (manually or automatically) Mojave's new "Dark Mode"

<https://nightowl.kramser.xyz>

An additional resource that was not discussed in the presentation:

**Mojave 3rd Party Software Compatibility** - an actively updated listing of third-party software compatibility/incompatibility with Mojave:
